CORK, Ireland, May 4, 2022 -- Johnson Controls International plc (NYSE: JCI), a global leader for smart, healthy and sustainable buildings, today reported fiscal second quarter 2022 GAAP earnings per share ("EPS") from continuing operations, including special items, of \$0.02. Excluding special items, adjusted EPS from continuing operations was \$0.63, up 21% versus the prior year period (see attached footnotes for non-GAAP reconciliation).

"Demand for innovative solutions that address urgent needs for sustainability, energy efficiency, and higher indoor environmental quality continues to accelerate," said George Oliver, chairman and chief executive officer. "We delivered another quarter of strong order, revenue and profit growth in Q2. We are, however, experiencing more near-term supply chain disruptions than expected, which have negatively impacted the pace and mix of our backlog conversion."

"The underlying fundamentals of our business remain strong, and I am confident in our ability to navigate the temporary headwinds impacting our profitability. We continue to make progress toward enabling our strategic vision to digitally transform the buildings industry, leveraging our OpenBlue digital platform to capitalize on the attractive global trends over the next decade." Oliver continued.

"I remain encouraged by the momentum we are seeing across our portfolio, and believe we are positioned to deliver attractive order, backlog, revenue, and EPS growth this year and beyond," said Olivier Leonetti, chief financial officer. "Near term uncertainties related to the lockdown in China and geopolitical instability, coupled with the impact of ongoing supply chain disruptions, warrant a more cautious outlook and a revision to our second half expectations. Looking ahead, the strength of our backlog and the improving

margin profile, together with our cost savings programs, positions us to deliver on the financial targets we set for the medium term."

4. Free Cash Flow Conversion

The Company's press release contains financial information regarding free cash flow and free cash flow conversion, which are non-GAAP performance measures. Free cash flow is defined as cash provided by operating activities less capital expenditures. Free cash flow conversion is defined as free cash flow divided by adjusted net income attributable to JCI. Management believes these non-GAAP measures are useful to investors in understanding the strength of the Company and its ability to generate cash. These non-GAAP measures can also be used to evaluate our ability to generate cash flow from operations and the impact that this cash flow has on our liquidity.

The following is the three months and six months ended March 31, 2022 and 2021 reconciliation of free cash flow and free cash flow conversion for continuing operations (unaudited):

	Three Months Ended				Six Months Ended

5. Net Debt to EBITDA

The Company provides financial information regarding net debt to adjusted EBITDA, which is a non-GAAP performance measure. The Company believes the total net debt to adjusted EBITDA ratio is useful to understanding the Company's financial condition as it provides a review of the extent to which the Company relies on external debt financing for its funding and is a measure of risk to its shareholders. The following is the March 31, 2022 calculation of net debt to adjusted EBITDA (unaudited):

(in millions)	March 31, 2022		
Short-term debt and current portion of long-term debt	\$	2,284	
Long-term debt		7,366	
Total debt		9,650	
Less: cash and cash equivalents		1,787	
Total net debt	\$	7,863	
Last twelve months adjusted EBITDA	\$	3,660	
Total net debt to adjusted EBITDA		2.1x	

The following is the last twelve months ended March 31, 2022 reconciliation of income from continuing operations to adjusted EBIT and adjusted EBITDA, which are non-GAAP performance measures (unaudited):

(in millions)	Last Twelve Months Ended March 31, 2022		
Income from continuing operations	\$	1,448	
Income tax provision		727	
Net financing charges		207	
EBIT	-	2,382	
Adjusting items:			
Net mark-to-market adjustments		(140)	
Restructuring and impairment costs		579	
Silent-Aire transaction and other nonrecurring costs		36

Charges attributable to the suspension of operations in Russia		11	
Adjusted EBIT (1)		2,825	
Depreciation and amortization		835	
Adjusted EBITDA (1)	\$	3,660	

(1) The Company's definition of adjusted EBITDA excludes special items because these costs are not considered to be directly related to the underlying operating performance of its businesses. Management believes this non-GAAP measure is useful to investors in understanding the ongoing operations and business trends of the Company.

6. Trade Working Capital as a Percentage of Net Sales

The Company provides financial information regarding trade working capital as a percentage of net sales, which is a non-GAAP performance measure. Trade working capital is defined as current assets less current liabilities, excluding cash, short-term debt, the current portion of long-term debt, the current assets and liabilities held for sale, accrued compensation and benefits, and other current assets and liabilities. Management believes this non-GAAP measure, which excludes financing-related items, non-trade related items and businesses to be divested, is a more useful measurement of the Company's operating performance. The following is the March 31, 2022 and March 31,

(in millions)	March 31, 2022		March 31, 2021	
Current assets	\$	11,612	\$	10,204
