

Tyco Fire Protection Products to exit fluorinated firefighting foam (AFFF) market by June 2024

MILWAUKEE — July 18, 2023 — Tyco Fire Protection Products today announced it will discontinue the production and sale of fluorinated firefighting foams by June 2024, including Aqueous Film-Forming Foam (AFFF) and related products, and will transition to non-fluorinated foam alternatives.

“We have long been a leader in delivering the most innovative, life-saving fire protection solutions in the industry,” said Chris Eichmann, vice president and general manager, Global Fire Solutions. “Recent advances have allowed us to create a portfolio of new, non-fluorinated firefighting foam solutions that are effective against a range of fire conditions. Today’s announcement reinforces our commitment to move toward more sustainable, effective solutions for our customers and the communities that we protect.”

Recognized for trusted solutions to protect people and property, Tyco provides customers with a robust portfolio of fire suppression solutions. Tyco’s firefighting foam products are used to quickly put out and prevent reignition of flammable liquid fires such as those encountered in the oil and gas industry. For several years, Tyco has made and continues to make significant investments to bring to market next-generation non-fluorinated foam solutions that control and extinguish the most challenging fires.

Tyco has begun contacting current foam customers to notify them of this product update, and over the coming months will partner closely to recommend the best solution to meet their specific fire suppression requirements for the future.

Cautionary Statement Regarding Forward-Looking Statements

Tyco Fire Protection Products has made statements in this communication that are forward-looking and therefore are subject to risks and uncertainties. All statements in this document other than statements of historical fact are, or could be, “forward-looking statements” within the meaning of the

Private Securities Litigation Reform Act of 1995. In this communication, statements regarding Tyco Fire Protection Products' plans to exit AFFF and transition to non-fluorinated foam alternatives are forward-looking statements. Words such as "may," "will," "expect," "intend," "estimate," "anticipate," "believe," "should," "forecast," "project" or "plan" and terms of similar meaning are also generally intended to identify forward-looking statements. However, the absence of these words does not mean that a statement is not forward-looking. Tyco Fire Protection Products cautions that these statements are subject to numerous important risks, uncertainties, assumptions and other factors, some of which are beyond its control, that could cause its future operating plans to differ materially from those expressed or implied by such forward-looking statements. You should not place undue reliance on such statements. The forward-looking statements included in this communication are made only as of the date of this document, unless otherwise specified, and, except as required by law, Tyco Fire Protection Products assumes no obligation, and disclaims any obligation, to update such statements to reflect events or circumstances occurring after the date of this communication.
